ABOUT ACE CLIMATE

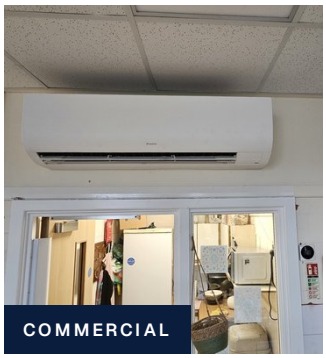

Built on experience. Driven by standards.

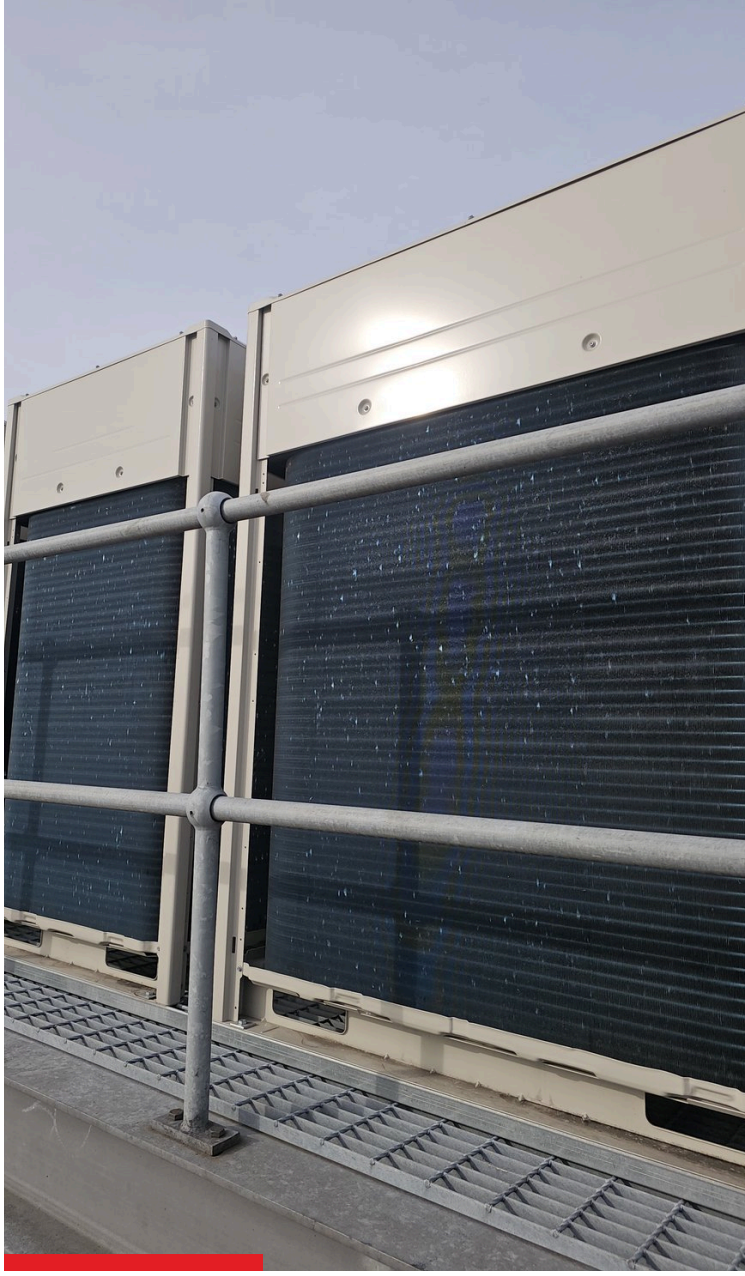

ACE Climate provides air-conditioning installation, servicing, planned maintenance and fault finding for homes and businesses across Greater Manchester, Cheshire and North West England.

The company is built on more than 20 years of hands-on air-conditioning and HVAC industry experience across domestic and commercial environments.

Rather than simply completing one-off jobs, we aim to build long-term relationships — with planned maintenance, reliable aftercare, honest advice and clear communication at the centre of how we work.

HOW WE WORK

01

Survey

We assess the property, room usage and your requirements.

02

Recommend

Clear, honest options with a written quotation.

03

Deliver

Professional installation, testing and commissioning.

04

Support

Maintenance options, service records and aftercare.

AIR-CONDITIONING INSTALLATIONS

Designed. Installed. Supported.

From a single wall-mounted unit in a bedroom or garden room to ceiling cassettes and multi-unit systems for commercial premises, we advise on the right equipment, install it to a high standard and commission it for dependable operation.

Homes & garden rooms

Bedrooms, living spaces, garden offices and studios.

Commercial premises

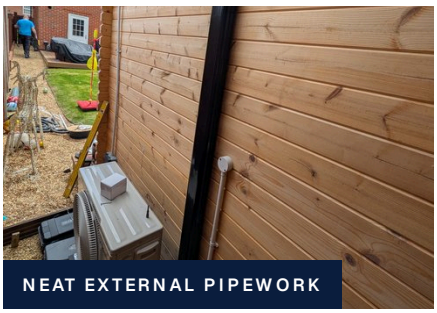

Offices, clinics, salons, retail and hospitality.

STEP BY STEP

1. Free initial site survey
2. Room and usage assessment
3. System recommendation
4. Written quotation
5. Professional installation
6. Testing and commissioning
7. Handover guidance
8. Maintenance plan option

PLANNED MAINTENANCE

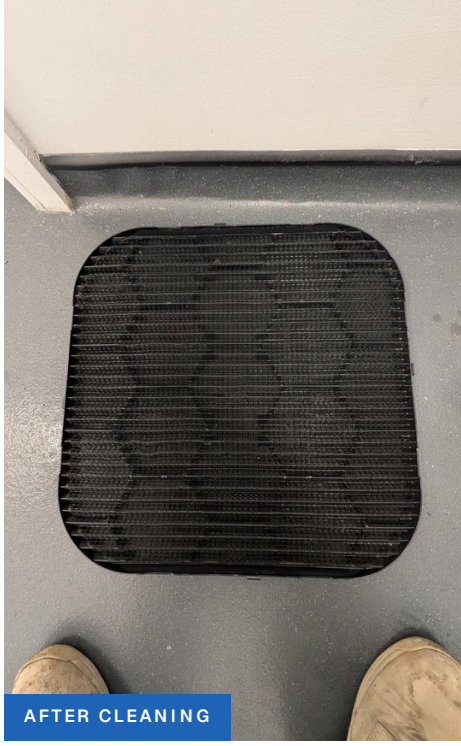

Protect your investment

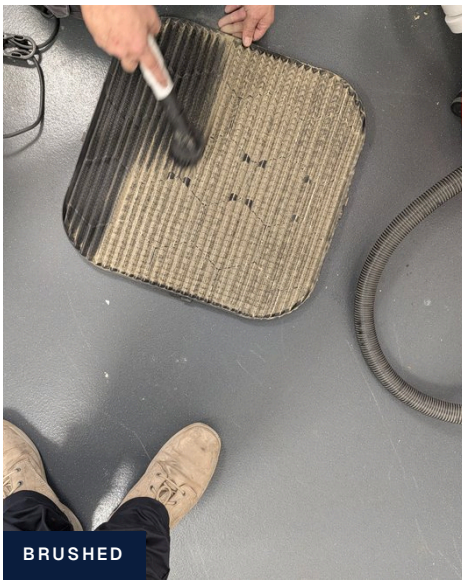

Regular servicing supports efficient performance, helps identify developing faults early and keeps equipment in better condition.

TYPICAL SERVICE CHECKS

- Indoor unit inspection
- Filter cleaning
- Heat exchanger inspection
- Outdoor unit inspection
- Condensate and drainage checks
- Electrical checks
- Operational testing
- Written recommendations

Photographs from a single ACE Climate maintenance visit: ceiling-cassette filters as removed, during cleaning and after cleaning.

One-off services

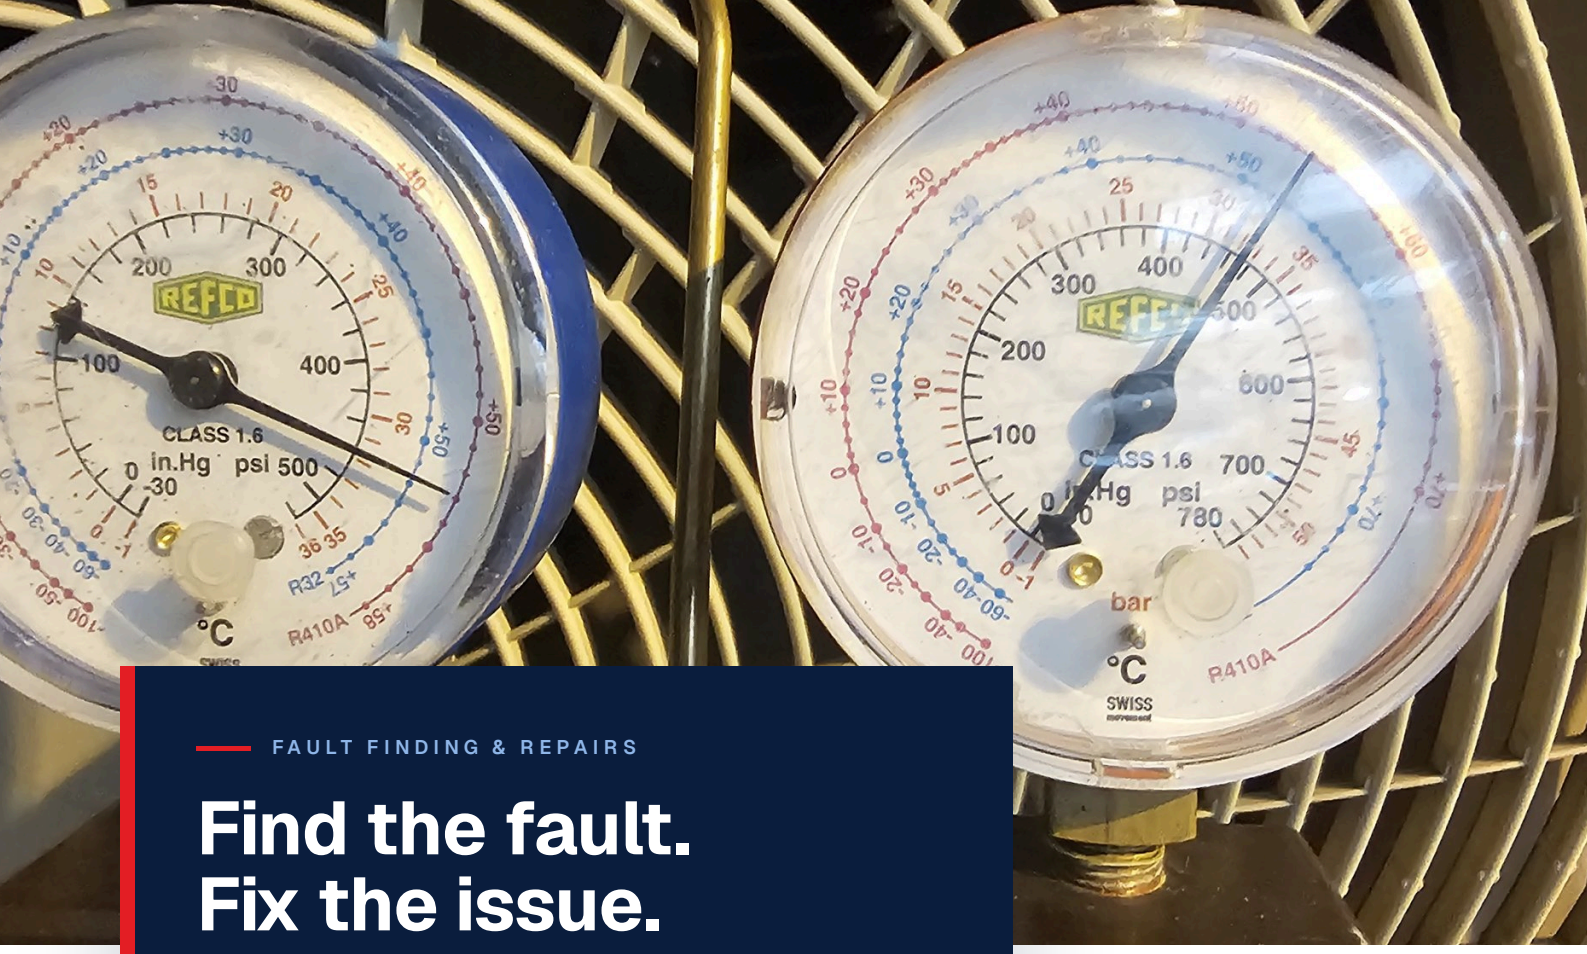

A single visit to clean, check and report on your system — ideal before the summer.

Maintenance agreements

Scheduled visits tailored to your equipment and site, with documented work and clear advice on anything we find.

Records that mean something

Written records after every visit, so you always know what was checked and what is recommended.

FAULT FINDING & REPAIRS

Find the fault. Fix the issue.

When cooling or heating performance drops, clear diagnosis matters. We investigate, explain what we find and recommend the next steps before any repair work goes ahead.

HOW WE APPROACH A FAULT

01 Initial fault assessment

02 Visual inspection

03 Controller and error-code checks

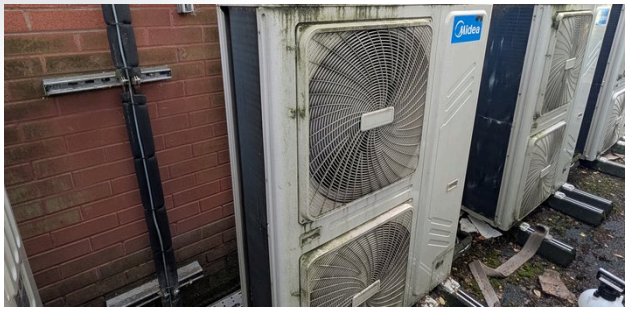

04 Electrical testing where appropriate

05 Operational testing

06 Clear explanation of findings

07 Written repair recommendation

08 Quotation for follow-on work where required

COMMON PROBLEMS

- Running but not cooling
- Water dripping indoors
- An error code on the controller
- Tripping the electrics
- Noisy, rattling or vibrating
- Smells when it runs
- Heating but not cooling
- Turning itself off

Reporting a fault? Photograph the controller display before clearing any fault code, and note the make and model from the unit's label. It helps us arrive prepared.

TECHNICAL & SPECIALIST ENVIRONMENTS

Cooling where it matters

Server rooms, comms areas and technical workspaces often need dedicated, reliable cooling. We can advise on suitable air-conditioning and maintenance for these spaces, subject to the needs of each site.

DEDICATED COOLING FOR A COMMS ROOM

Server & comms rooms

Advice on dedicated systems for spaces where equipment generates heat around the clock.

Commercial systems

Experience with split, multi-split and VRF/VRV systems in commercial buildings.

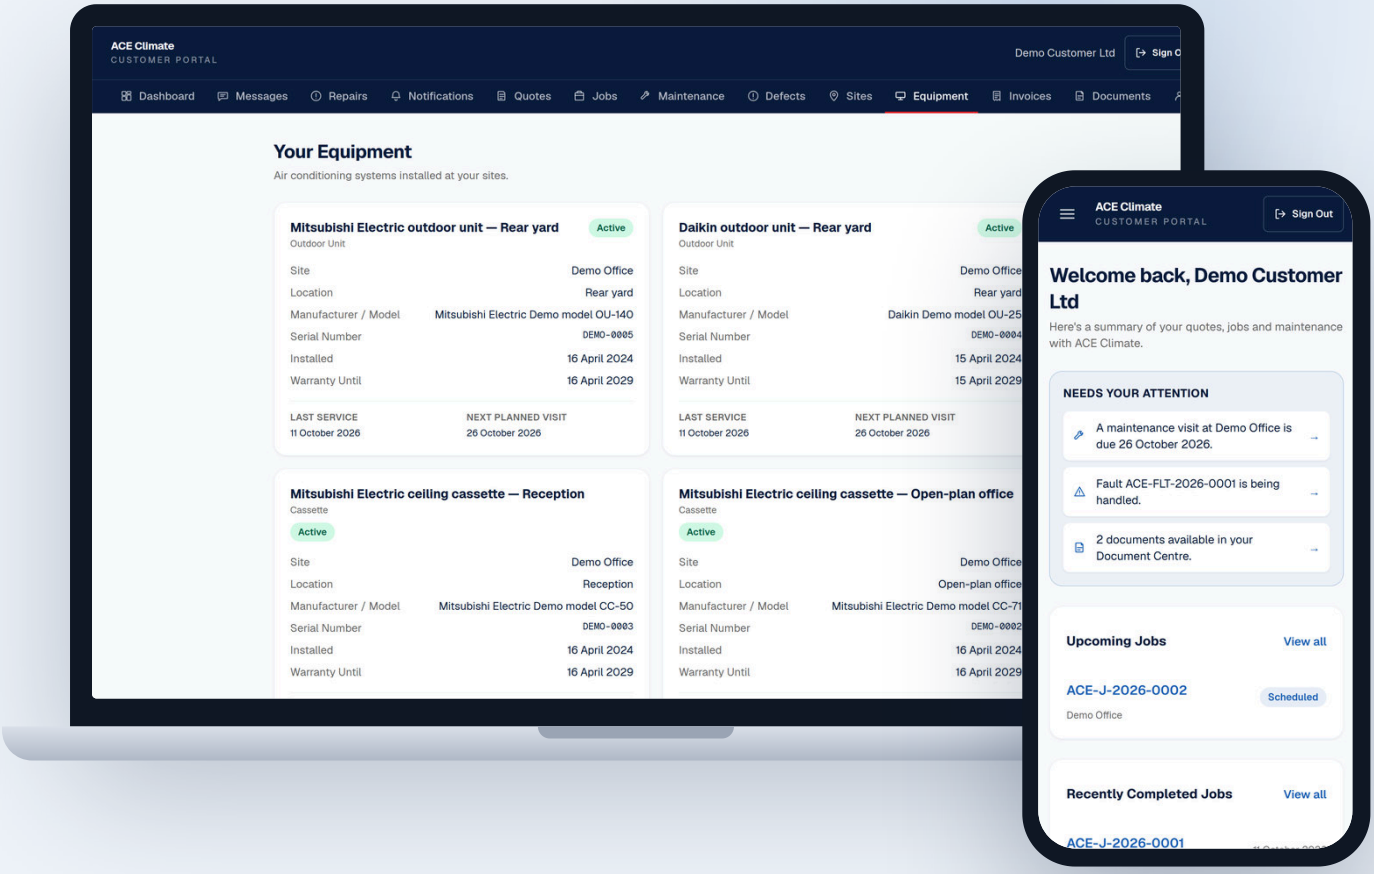

Ongoing support

Planned maintenance and fault finding to help keep critical cooling running.

THE ACE CUSTOMER PORTAL

Your equipment, visits and paperwork in one place

ACE Climate customers can be given secure access to their own online portal — a clear record of the equipment we look after and the work we have carried out.

Equipment register

Each unit at each site, with its service history.

Maintenance

Your maintenance plan and completed visits.

Report a repair

Report a fault, add photos and follow its progress.

Documents

Reports and paperwork, ready to download.

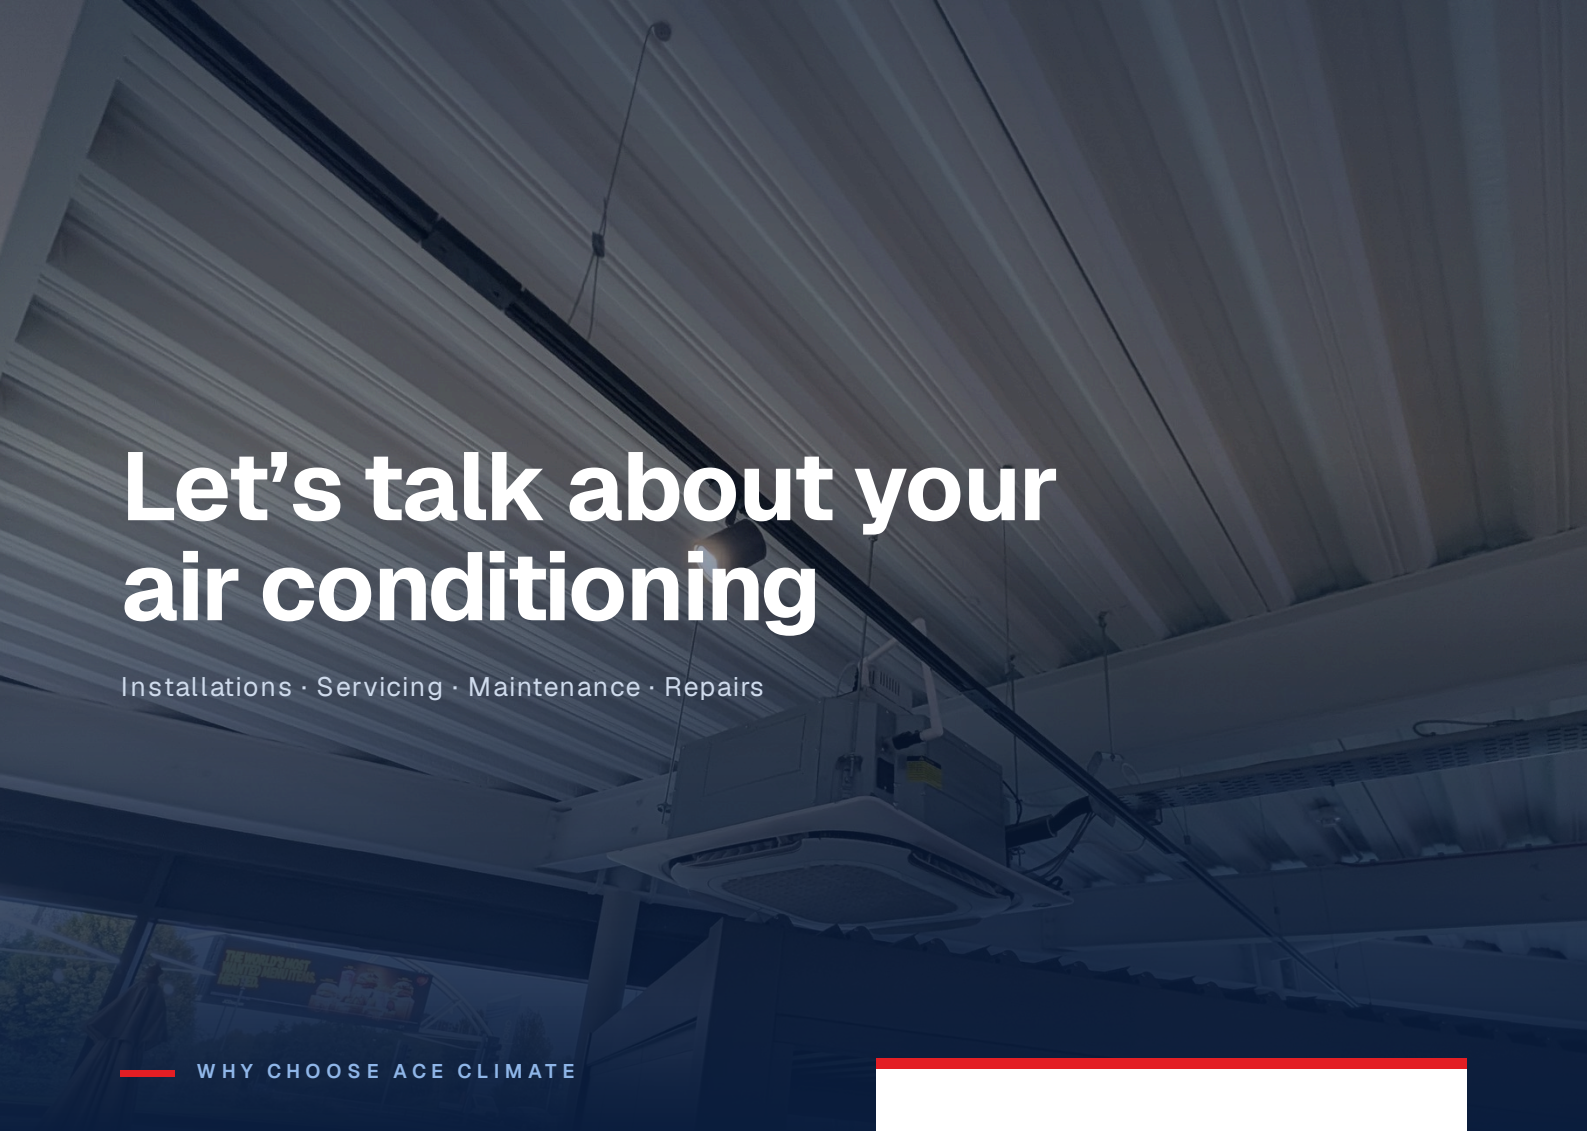

Quotes & invoices

View and download your quotes and invoices.

Messages

Talk to the ACE Climate office in one thread.

Portal access is set up by ACE Climate for each customer account. Screens shown use demonstration data, not real customer information.

Let’s talk about your air conditioning
